(b) The Government have taken major steps for liberalisation of trade which include provisions, such as, exports-linked imports, reduction of import licensing, strengthening export incentives, removal of procedural irritants, simplification of policy and procedures and pruning of negative lists of imports and exports. In the 93-94 budget, system of market determined unified exchange rate has been introduced, customs and excise duties reduced on raw materials and capital goods and interest rate on rupee export credit has been reduced. The Exim Policy 92—97 has been amended to include the scheme of Export Oriented Units for agricultural and allied products. The State Governments are also being involved in export promotion efforts. An Exporter's Redressal Cell has been set up in the Commerce Ministry to facilitate action on problems being faced by exporters. Need-based imports have been permitted consisting mainly of raw material, components and capital goods required for production. As a result of these steps the trade deficit during April-June '93 is considerably lower at US $ 301 million compared to US $ 1564 million during the corresponding period of previous year.

Assessment of export performance is a continuous and ongoing activity. Government is always responsive to suggestions which are conducive to export growth and steps are taken to remove these problems.
